# Your findings

---

Your scan was completed with the following findings discovered.

Listed below are your most recent findings, with the most severe listed first. To improve your threat score, prioritise these top issues.

| Severity    | Issue Type                                 | Times found |
|-------------|--|-------------|
| MEDIUM      | Environment Variable Disclosure            | 1           |
| MEDIUM      | Exposed Git-ignore                         | 1           |
| MEDIUM      | Exposed PHP-Info                           | 1           |
| MEDIUM      | NPM Packages Disclosure                    | 2           |
| MEDIUM      | Composer Configuration Disclosure          | 3           |
| MEDIUM      | Webpack Mix File Disclosure                | 1           |
| LOW         | Script Integrity Attribute Not Implemented | 1           |
| INFORMATION | Wildcard Cookie Policy                     | 2           |
| INFORMATION | Fingerprinted Software                     | 1           |
| INFORMATION | External Resources                         | 5           |
| INFORMATION | HTML Comments                              | 100         |
| INFORMATION | Discovered Host                            | 1           |
| INFORMATION | Crawled URL's                              | 1           |
| INFORMATION | Service Providers                          | 1           |
| INFORMATION | TLS Certificate Will Expire                | 1           |

# 1 Environment Variable Disclosure

## Summary

### What does this mean?

An attacker can access this file and read the potentially sensitive data it contains.

### What can happen?

The file is exposed towards the internet and it's believed to contain sensitive data.

### Found at

1.1 <https://caa.omaniservers.com/.env.staging>

### CVSS Score

6.8

## 2 Exposed Git repository

---

### Summary

#### What does this mean?

An attacker can get hold of sensitive information, which can lead to stolen source code.

#### What can happen?

A config file related to a Git repository is publicly available.

#### Found at

2.1 <https://caa.omaniservers.com/.gitignore>

#### CVSS Score

5.3

## 3 Exposed PHP-Info

---

### Summary

#### What does this mean?

An attacker can read all sorts of PHP-related technical configurations made on the web server and use that knowledge for further attacks.

#### What can happen?

The PHP-function phpinfo() is accessible publicly.

#### Found at

3.1 <https://caa.omaniservers.com/info.php>

#### CVSS Score

5.3

# 4 NPM Packages Disclosure

---

## Summary

### What can happen?

Are you aware of that this file exists? This file may contain sensitive information.

### Found at

### CVSS Score

- 4.1 <https://caa.omaniservers.com/package-lock.json>
- 4.2 <https://caa.omaniservers.com/package.json>

4.9  
4.9

# 5 Composer Configuration Disclosure

## Summary

### What can happen?

Are you aware of that this file exists? This file may contain sensitive information.

### Found at

### CVSS Score

|     |   |     |
|-----|---|-----|
| 5.1 | <a href="https://caa.omaniservers.com/composer.json">https://caa.omaniservers.com/composer.json</a>                                   | 4.9 |
| 5.2 | <a href="https://caa.omaniservers.com/composer.lock">https://caa.omaniservers.com/composer.lock</a>                                   | 4.9 |
| 5.3 | <a href="https://caa.omaniservers.com/vendor/composer/installed.json">https://caa.omaniservers.com/vendor/composer/installed.json</a> | 4.9 |

# 6 Webpack Mix File Disclosure

---

## Summary

### What can happen?

Are you aware of that this file exists? This file may contain sensitive information.

### Found at

6.1 <https://caa.omaniservers.com/webpack.mix.js>

### CVSS Score

4.7

# 7 Script Integrity Attribute Not Implemented

## Summary

### What does this mean?

If the contents loaded from another domain is not verified the browser will execute the contents without verifying with a correct hash.

### What can happen?

JavaScript files loaded from another domain should be verified using the integrity attribute.

This finding will often be relevant for several or all pages in a report. Since this can potentially generate a finding for every URL scanned, you might only see one finding to represent the global issue.

### Found at

7.1 <https://caa.omaniservers.com/>

### CVSS Score

3.1

# 8 Wildcard Cookie Policy

---

## Summary

### What does this mean?

This widens the scope for XSS attacks as an XSS vulnerability at a subdomain can affect the cookies of another subdomain.

### What can happen?

The cookie's value can be read or written from all sub domains.

Read more [<https://support.detectify.com/support/solutions/articles/48001048994-wildcard-cookie-policy>here].

| Found at                  | CVSS Score |

| 8.1 .caa.omaniservers.com | 0          |
| 8.2 .caa.omaniservers.com | 0          |

# 9 Fingerprinted Software

---

## Summary

### What does this mean?

Invalid fingerprints may cause an audit to take longer, and the lack of fingerprints may cause Detectify to miss running specific tests.

### What can happen?

When Detectify audits an application, it collects various fingerprints that indicate what software is running. These fingerprints then allow Detectify to run specific tests when the time is right.

### CVSS Score

0

# 10 External Resources

## Summary

### What does this mean?

The owner of the domain the resources are loaded from has control of the resources and can change it without the owner of the web site knowing. By doing so, the owner of the domain the resources are loaded from can also affect the web site loading the resources.

This could be done by the owner of the external domain or an attacker who manages to hack it.

### What can happen?

The web site includes resources hosted on an external domain. Please note that a domain counts as external if it's not within your scan scope, so you should verify if you control the resources on the external domain or not.

# 11 HTML Comments

## Summary

### What does this mean?

The snippets of code within comments will remain inactive until you remove the comment brackets. The comments might also contain sensitive information not meant for the public.

### What can happen?

HTML comments, used to store temporary code written by the developers, are visible to the public. Read more at our [https://support.detectify.com/support/solutions/articles/48001048959-html-comments|knowledge base].

# 12 Discovered Host(s)

---

## Summary

### What can happen?

Detectify has found the following hosts. This is in no way a vulnerability, but should be considered an indicator for what has been covered.

Read more [<https://support.detectify.com/support/solutions/articles/48001048970-discovered-endpoint>].

### Found at

### CVSS Score

12.1 caa.omaniservers.com

0

# 13 Crawled URL's

---

## Summary

### What does this mean?

A scan might take too long due to representative content on the application. Vulnerabilities may also be missed if Detectify lack coverage in some area of the application. If you suspect Detectify can perform better, then take a look at the associated CSV.

### What can happen?

This finding is generated for debugging purposes. A link is associated with this finding containing a CSV file with all crawled URL's.

### Found at

13.1 caa.omaniservers.com

### CVSS Score

0

# 14 Service Providers

## Summary

### What does this mean?

Anyone can retrieve this data. It's only here to serve as an indicator of what vendors have access to.

### What can happen?

The listed providers are authorized to host different parts of your infrastructure.

Read more [<https://support.detectify.com/support/solutions/articles/48001048980-service-providers> here].

# 15 TLS Certificate Will Expire

---

## Summary

### What does this mean?

An attacker who can intercept the traffic between the server and the victim may read the traffic in plain text when the certificate has expired.

### What can happen?

The TLS certificate is about to expire.
